Center for Mathematical Achievement in Science and Technology (CMAST)

STEM Learning Community

The Center for Mathematical Achievement in Science and Technology's (CMAST) would like to invite you to join the STEM Learning Community at Grambling State University. The STEM Learning Community is designed for first year college students to work in interactive teams in order to improve student learning and increase student success. These communities allow freshmen the opportunity to collaborate with each other while developing strong foundations in science through shared classes, social activities, peer academic coaching, and faculty mentoring. The STEM Learning Community does not offer a residential component and all activities are during the 2013-2014 academic year. Each participant will receive a **\$500 textbook award per semester of the freshman year** to the Barnes and Nobles Bookstore located on GSU's campus to be used for purchasing books only.

Each participant is required to:

- Enroll in two designated courses: Math and English. **(The CMAST director will have the registrar's office enroll you in the two CMAST courses if you sign up to be in the STEM Learning Community. You will be required to enroll yourself in the other courses based on your curriculum that you will discuss with your academic advisor.)**
- Meet with each of your professors during office hours at least six times during the semester. Come with a question about the course, point(s) from the lecture, or the subject.
- Attend required tutorial sessions. Additional Math clinic hours will be required for students not passing at midterms.
- Attend STEM Learning Community student development events, such as student success workshops and scientific research presentations.
- Attend required events (such as plays, art exhibits, the Eddie Robinson Museum, the President's Annual Dinner Theatre, or sporting event).

If you are interested in joining the STEM Learning Community, please fill out the contact information below and return to:
